U-VER CURE

MATTE AND SATIN HIGH SPEED WEB ULTRAVIOLET CURABLE OVERPRINT COATINGS

U-VER CURE 600 WEB MATTE

Is an ultraviolet curable coating specifically designed for high speed web applications. U-Ver Cure 600 Web Matte cures to a rapid dull appearance with a smooth, silky laydown. The advanced technology of U-Ver Cure Web Matte will not build up in viscosity during press runs commonly associated with traditional U.V. matte coating chemistry.

U-VER CURE 625 WEB SATIN

Has essentially the same outstanding performance characteristics of U-Ver Cure 600 except for having a higher reflective gloss reading. Should a higher or lower gloss reading be necessary, Amalgamated's satin overprint coatings can be formulated to match any desired gloss reading to meet any end requirement.

PRESS APPLICATIONS

U-Ver Cure overprint coatings can be employed to be applied in all types of web coater apparatus', wet or dry trap.
